Description

These shapes were designed with wave riding in mind. Many SUP shapes lean more toward the paddling side but I've taken the liberty of assuming the customer has already learned his paddling/balance skills and is looking to maximize his surfing performance.

I've made some compromises to ease of paddling with the outline template, leaving some width in the front end but without using a full longboard type nose. The bottom shape utilizes a single-to-double concave to give lift and speed in critical situations so going fast enough to make waves should not be a problem. Either size should have plenty of floatation for 200 lb. surfers, depending on their skills. The concave bottom creates stability and the gentle rocker allows the boards to slip easily through the water whether one is paddling for a wave or just cruising across a lake.

Fin System: FUTURES
Fin Setup: Tri

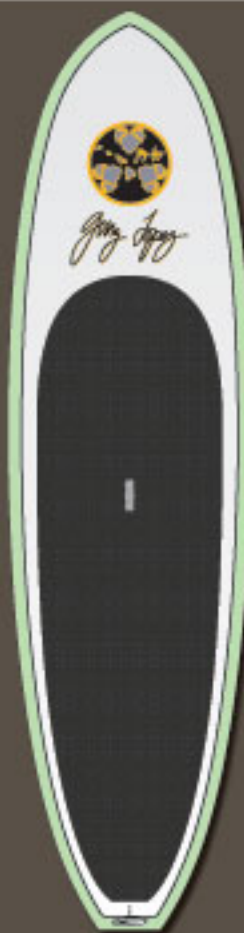

The boards come with the fin set-up for a thruster/tri-fin style. The single center box, however, can easily accept a bigger template single fin for those that prefer it or even if one likes the 2+1 set-up of smaller side fins and a medium size single fin ... all applications work and are merely a matter of personal preference. For me the thruster set-up seems to work best.

LIL DARLING

8'11"

L1825

N: 20 1/2"
M: 28 1/2"
T: 18 1/4"
TH: 4 1/8"
Volume: 126

Description

The Lil Darling's shape is basically a scaled down version of the Surf Music series but with a quad fin set-up. I have found the quad fins to work very well in wave riding ... looser, faster and just as positive.

Fin System: FUTURES
Fin Setup: Quad

Have fun and always surf with aloha ...
